	MATHEMATICS – I	
	Subject Code : BSIT/BSBC-103	
	M.Code:10045	
	Date of Examination : 14-01-2023	
Time:3 Hrs.		Max. Marks:60

Total No. of Pages : 02

## **INSTRUCTIONS TO CANDIDATES :**

- 1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
- 2. SECTION-B contains SIX questions carrying TEN marks each and students have to attempt any FOUR questions.

## **SECTION-A**

1. Write briefly:

Roll No.

- a) Explain with illustration :
  - i) Symmetric Matrix ii) Skew symmetric Matrix
  - iii) Transpose of a Matrix iv) Unitary Matrix
- b) Let  $A = \{1, 2, 3, 4, 5, 6\}$   $B = \{2, 4, 6, 8\}$  then show that  $A \setminus B \neq B \setminus A$ .
- c) Define Recurrence relation with example.
- d) Solve S (k) 2S(k-1) + S(k-2) = 0 where S (0) = 1, S (1) = 2.
- e) If *p* stands for the statement, "I do not like coffee" and *q* stands for the statement, "I like tea". Then what does  $\sim p \land q$  stands for ?
- f) Show that maximum number of edges in a single graph with h vertices is  $\frac{n(n+1)}{2}$ .
- g) Find all the partitions for set  $A = \{a, b, c\}$ .
- h) Explain the concept of propositions over a universe.

i) Find X and Y if X + Y = 
$$\begin{bmatrix} 7 & -2 \\ 2 & 6 \end{bmatrix}$$
  
X - Y =  $\begin{bmatrix} 3 & 0 \\ 2 & 3 \end{bmatrix}$ 

j) Define sample and multigraph with an example.

## **SECTION – B**

- 2. a) A college awarded 38 medals in Foot-ball, 15 in basket ball and 20 medals in cricket. If there medals went to a total of 58 men and only three men got medals in all the three sports, how many received medal in exactly two of the three sports?
  - b) Let  $A = \{x : x \text{ is multiple of } 2, x \in N\}$

 $B = \{x : x \text{ is multiple of } 5, x \in N\}$ 

 $C = \{x : x \text{ is multiple of } 10, x \in N\}$ 

Then find  $A \cup (B \cap C)$ ,  $(A \cap B) \cap C$ ,  $A \cup (B \cup C)$ .

3. a) Test the validity of :

Unless we control population, all advances resulting from planning will be nullified but this must not be allowed to happen. Therefore we must somehow control population.

b) Prove that  $[(p \rightarrow q) \times (q \rightarrow r)] \Rightarrow (p \rightarrow r)$  is a tautology,

4. a) If 
$$A = \begin{bmatrix} 0 & 1 & 2 \\ 2 & 3 & 4 \\ 4 & 5 & 6 \end{bmatrix}$$
 and  $k_1 = 1, k_2 = 2$  then verify that  $(k_1 + k_2) A = k_1 A + k_2 A$ .  
b) If  $A = \begin{bmatrix} 1 & 0 & 0 \\ 0 & 1 & 0 \\ a & b & -1 \end{bmatrix}$  then determine  $A^2$ .

- 5. Prove that an undirected graph possesses a Eulerian circuit if and only if it is connected and has its vertices of even degree.
- 6. a) Prove that associativity holds over conjunction by using propositional calculus.

b) Solve S 
$$(k) - 7s(k-1) + 10$$
 S  $(k-2) = 6 + 8k$  with S  $(0) = 1$  and S $(1) = 2$ .

7. Use the principle of mathematical Induction to prove that

$$1.3 + 2.4 + 3.5 + \dots + n (n+2) = \frac{n(n+1)(2n+7)}{6}$$
 for any natural number *n*.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
